

AUGUST 24-27
MARCO ISLAND, FLORIDA

Supporters

Women in Ophthalmology (WIO) was founded to enhance and improve the professional environment for women ophthalmologists. WIO encourages diversity, impartiality, economic parity, and strives to cultivate new opportunities for leadership, education, and public service in the field of ophthalmology for ourselves and future generations. What started as a lunch meeting at the American Academy of Ophthalmology (AAO) has grown to an internationally recognized organization, an affiliate society of the AAO, which provides scientific/medical education and professional development resources for women in ophthalmology. WIO recognizes the many facets to being a female ophthalmologist and provides training, services, and benefits to meet all of those needs.

Welcome to Women in Ophthalmology 2023, where excellence meets innovation and remarkable accomplishments grace our path! As we gather here to embark on a new chapter, we cannot help but reflect on the extraordinary journey that led us to this momentous occasion.

Last year's record-breaking meeting in picturesque Monterey Bay remains etched in our hearts, as we proudly welcomed over 1000 attendees for the first time in our history! Women in Ophthalmology has continued to push the bounds and reimagine learning by presenting a rich, dual-track hybrid meeting that blends the best of virtual and in person education.

Crafted with meticulous curation, our exceptional program provides the finest selection of topics tailored exclusively for you. Prepare to be enthralled as you engage in sessions led by our field's most exceptional luminaries, rejuvenate your spirits through our live well program and nurture newfound connections during our networking sessions that will undoubtedly flourish into meaningful friendships.

Our gratitude knows no bounds for the leveled sponsors and exhibitors listed within these pages, whose unwavering support has once again been instrumental in shaping this remarkable event. Their benevolent contributions have made it possible for WIO to flourish, bringing forth not just a robust meeting but also a plethora of transformative leadership development programs. Through their visionary commitment, they have embraced the significance of our mission and have become our cherished partners in propelling women ophthalmologists towards achieving greater heights.

We invite you to explore the exhibit hall, both virtually and in person, and immerse yourselves in interactive networking events that promise to create lasting impressions. Our sponsors' generosity and dedication serve as a beacon, encouraging us to forge ahead and foster collaboration to ensure the highest quality ophthalmic care for our cherished patients.

May this gathering unfold with a symphony of new knowledge, unparalleled skills, and the blossoming of great friendships. We are deeply honored to have each of you as our esteemed guests and together, let us script a new chapter of empowering aspirations for women in ophthalmology!

With boundless gratitude and the utmost excitement,

Lisa M. Nijm, MD, JD

Chief Executive Officer, Women in Ophthalmology

We would like to express our sincerest thanks and appreciation
to our 2023 Summer Symposium leveled sponsors!

Meeting Information

Registration Hours

THURSDAY	3:00 pm – 7:30 pm
FRIDAY	6:00 am – 5:30 pm
SATURDAY	6:00 am – 5:30 pm
SUNDAY	6:30 am – 11:30 am

Badges

WIO name badges should be worn during all sessions and social events. Replacement badges can be obtained at the registration desk.

Meeting Attire

Business casual or vacation attire is encouraged for the duration of the meeting, and “beach glam with a splash of white” is appropriate attire for the Gala Dinner and Get Up and Dance Party.

Sweaters or light jackets are recommended at all indoor meeting events as it can be difficult to regulate temperature favorable to all.

Meals and Refreshments

Refreshment breaks, receptions, and meals provide continued networking opportunities. If you submitted special dietary requests, they have been noted and will be accommodated wherever possible. This meeting offers the following opportunities for registered attendees:

CME Spotlight Meal Sessions and Friday Dinner Symposium

The CME Spotlight meal sessions scheduled throughout the meeting and the Friday Dinner Symposium are intended for *registered physician attendees only*.

Medical Student Mentoring Lunches

These lunch sessions are intended for *registered medical students* and run concurrently with the CME Spotlight lunch sessions on Friday and Saturday afternoon.

Exhibit Hall Breaks and Social/Networking Events

All registered attendees are invited to our snack breaks in the Exhibit Hall and our social events throughout the meeting including:

THURSDAY

- Play UP, Play ON – Meet & Greet Social
- Opening Reception – Sandals & Sunset Champagne Toast

FRIDAY

- Snack Break in Exhibit Hall
- A Taste of Sweetness – Social & Networking Reception

- Networking, Nightcaps & Nibbles – Exhibit Hall Dessert Reception

SATURDAY

- Snack Break in Exhibit Hall
- Sunset Networking Reception
- Evening Cocktail Reception / Group Photo
- Gala Dinner
- Get Up and Dance!

Personal Guest Hospitality Lounge

Breakfast will be available for registered spouses, personal guests, and children on Friday and Saturday in our Guest Hospitality Lounge. Personal guests are welcome to grab breakfast from Calusa 6/7 on Sunday morning with the physician attendees. Seating will be available outside the general session room. Your registered children are welcome to eat in the Lounge with a registered adult, or check-in to WIO’s childcare services where meals will be provided.

Gala Dinner / Get Up and Dance!

All registered attendees are invited to attend our Gala Dinner, including medical students, physician attendees, industry, and personal guests. Hear some meeting highlights and special recognitions while you dine, and listen for your name as we conduct our final raffle of the meeting! Child registrants between the ages of 4 and 12 are encouraged to utilize WIO’s childcare services provided during the Gala Dinner.

After the Gala, get ready for a night of dancing and raffle prizes at our annual “Get Up and Dance” party. Children are not invited to attend the Dance Party, which is for registered adults only.

Speaker Ready Location

Presenters must submit final slide presentations to the audiovisual staff no less than 2 hours prior to their presentation. Audiovisual staff will be located at the back of the general session room ready to assist you.

Exhibits / WIO*Go

Mingle with manufacturers, distributors, and suppliers of products in the field of ophthalmology. Play WIO*Go (Exhibitor Bingo) by collecting stamps from our exhibiting supporters on the game card located in your Swag Bag. Drop the card off at the Registration Desk by 3:30 PM on Friday and Saturday to be entered in the raffle drawings. Great prizes are in store for the raffle winners who will be announced during the Friday night dessert reception, and during the Saturday evening Gala.

Meeting Information

Exhibit Hall Hours

Our Exhibit Hall will be open during the times listed below, including the Dessert Reception on Friday night. Please view the detailed program schedule for Exhibit Hall Break times.

FRIDAY 7:00 AM – 3:30 PM, 8:00 PM – 9:00 PM

Mothers' Room

A Mother's Room is available for the duration of the meeting. Please check in at the registration desk for access to this private space.

Prayer Room

A Prayer Room is available for the duration of the meeting. Please check in at the registration desk for access to this space.

Wi-Fi Internet Access

Wi-Fi internet access is available in the meeting areas. Check signage for network and password access.

Photographing, Social Media and Recording of Exhibits, Posters and Presentations

WIO's policy for the use of photography and social media aims to balance the needs between presenters, patients, and advocates for the latest information and the needs of presenters to protect their proprietary information from unauthorized use. As a presenter, if you do not wish to have your slides shared on social media or photographed, please verbally make a statement and provide a written slide in your presentation. Unless otherwise stated, non-flash photography is allowed for personal, social, and non-commercial use. Please respect presenters who state they do not want their slides and/or content photographed or shared on social media. Attendees taking photos must do so in a non-disruptive manner so as not to disturb the presenter and other attendees. Slides with patient faces or other identifiable information cannot be shared on social media due to HIPAA regulations. Video recording, live audio and/or video streaming is strictly prohibited. Failure to comply with this policy may result in being removed from the session and/or meeting.

Display or Distribution of Materials

WIO has retained use of The JW Marriott Marco Island to enable registered members and guests to participate in Society-sponsored educational and informational activities. Display or distribution of non-sponsored information or advertising in or on the property, except at exhibit tables and on the WIO notice board (upon approval), is prohibited. Violation of this policy may result in confiscation and disposal of the material.

Questions?

If you have questions regarding WIO or the Summer Symposium, please stop by the WIO Registration Desk during registration hours for staff assistance.

Special Recognitions

BERNICE Z. BROWN MEMORIAL LECTURE AND AWARD **FRIDAY 8:40 A.M.**

WIO's annual Bernice Z. Brown Memorial Lecture and Award has been generously sponsored this year by **Genentech**. This award is presented to an individual who has contributed to the profession of ophthalmology and to the advancement of women in the field. WIO is grateful to Genentech for their continued support of women in ophthalmology.

VIRTUAL SESSION **FRIDAY 9:25 A.M.**

Elios Vision is sponsoring an educational virtual session on Friday at 9:25 a.m. EDT during our virtual programming. The session is cleverly titled, **What the hELIOS**, and their speaker is Dr. Christine Funke. If you're attending the meeting in-person - no need to worry! You'll have the opportunity to view this session on-demand in our virtual platform for 60 days after the meeting.

ACADEMIC ADVANCEMENT **FRIDAY 1:20 P.M.**

Allergan an Abbvie Company is the supporter of WIO's academic advancement session, **Eye Teach: Roadmap to Academic Promotion**. Allergan has been a tremendous supporter of WIO over the years. Their continued partnership helps us bring you specialized programming, such as this session, to help advance the careers of the WIO community.

PROFESSIONAL DEVELOPMENT **FRIDAY 1:20 P.M.**

Genentech is the supporter of WIO's professional development session, **Advancing Your Outreach - Impactful Volunteerism Locally, Nationally, and Globally**. Their generous support makes it possible for these quality educational sessions to be presented during our Summer Symposium and helps fulfil our mission to enhance and improve the professional environment for women ophthalmologists.

EXHIBIT HALL BREAK **FRIDAY 1:45 P.M.**

Clearside Bio is sponsoring Friday's hour-long afternoon break in our exhibit hall with healthy bites and sweet treats to keep your energy high for our evening events! Thank you, Clearside Bio, for being a part of our meeting and supporting the WIO community!

Special Recognitions

MENTORING MIXER **FRIDAY 3:00 P.M.**

Horizon Therapeutics and WIO's Mentorship Committee are hosting Friday's mentor and mentee networking event. This is the perfect opportunity to cultivate powerful, dynamic mentoring relationships with amazing women! Join us for food, refreshing drinks, and raffle prizes. All WIO Mentorship Program participants are invited to attend.

A TASTE OF SWEETNESS: SOCIAL & NETWORKING RECEPTION **FRIDAY 4:00 P.M.**

Castle Biosciences is supporting Friday's Networking Reception where new connections will be made, and old friends will reunite. Stop by the Castle Biosciences table to join the ocular oncology discussion if you wish, and be sure to grab a treat (or two)!

FRIDAY NIGHT DINNER SYMPOSIUM **FRIDAY 6:30 P.M.**

Join us for dinner and an expert-led discussion presented by **Apellis Pharmaceuticals** and **Bausch + Lomb** at our Friday Night Dinner Symposium! This is one of the highlights of our meeting that you won't want to miss. All registered physician attendees are invited and welcome to attend.

HONORARY LECTURE AND AWARD **SATURDAY 10:00 A.M.**

WIO's annual Honorary Lecture and Award has been generously sponsored this year by **Genentech**. This award is presented to an individual who has contributed to the profession as an educator, researcher or humanitarian. Genentech is a true supporter of women in our field, and we're grateful for their partnership.

EXHIBIT HALL BREAK **SATURDAY 2:00 P.M.**

Ocuphire Pharma, Inc is sponsoring Saturday's hour-long afternoon break in our exhibit hall. Thank you, Ocuphire, for being a part of our meeting, and bringing this fun break to our attendees.

Special Recognitions

SUNSET NETWORKING RECEPTION **SATURDAY 4:00 P.M.**

Horizon Therapeutics continues their support by sponsoring our lovely Sunset Networking Reception, where connections will continue to be made and friendships will flourish. Networking is such an important part of the WIO meeting. We're grateful to be able to provide you with this Sunset Networking Reception, courtesy of Horizon Therapeutics.

OFFICIAL WIFI SPONSOR

We are excited to welcome **Iveric Bio** this year as WIO's exclusive WiFi sponsor. Thank you, Iveric Bio, for bringing the internet and WIO's virtual platform into the hands of our live attendees.

OMIC SESSION AND WIO MEMBER DISCOUNT - VIEW ON-DEMAND!

Thank you to **OMIC** for sponsoring our risk-management session: **Mitigating the Risks of Endophthalmitis Claims**. By viewing this session (on-demand in the virtual platform), OMIC insureds will earn a 5% risk management discount. OMIC insureds who are current WIO members can earn an additional 5% partner society discount! Be sure to sign in to earn credit. Stop by the OMIC exhibit to learn more.

OFFICIAL 2023 MEDIA PARTNERS

WIO would like to thank **Healio**, **Ophthalmology 360**, and **The Ophthalmologist** for being the official media sponsors of the 2023 WIO Summer Symposium!

WIO Mentorship Program

The new Women in Ophthalmology Mentorship Program kicked off before our Summer Symposium last year and has grown tremendously over the past year, with over 500 participants.

WIO's Mentorship Program provides encouragement and guidance to the next generation of ophthalmologists for a lifetime of impact. We aim to implement multi-faceted opportunities to engender organic mentorship relationships.

WIO's Mentorship Committee is dedicated to ensuring that WIO's Mentorship Program is a success and that our mentees and mentors have a positive and productive experience. We are thrilled to offer many mentorship opportunities to our members. Nearly 300 mentorship matches have been made to date, and we continue to host intimate virtual sessions with speakers who are true leaders in our field.

To join WIO's Mentorship Program, which is free to WIO members, simply scan the QR code below! (Please note, as of April 2023, there is a mentee waitlist.)

WIO Clinical Trials Training Program

The **Women in Ophthalmology Clinical Trials Training Program** continues its momentum with the aim to increase the number of women ophthalmologists in research. Our 2021 and 2022 programs were huge successes, and our 2023 program is in full swing! The rationale behind this program is twofold:

1. Diversity amongst clinical trial investigators fosters participation of diverse study patient populations.
2. There is a paucity of female lead investigators in ophthalmology.

If, as a profession, we truly want to increase diversity in leadership, research is the ideal venue to move the needle. Clinical trial involvement creates an abundance of leadership opportunities with the ability to author scientific publications, present findings at major meetings, and participate in advisory boards. As we have evaluated topics presented at our annual WIO Summer Symposium, we learned that many female ophthalmologists had an interest in being involved in clinical research but would like further education in understanding how to initiate a clinical trial, recruit patients, handle an audit, manage budget shortfalls, etc.

CLINICAL TRIALS PROGRAM SURVEY

To clearly define educational gaps and provide meaningful educational content, we launched a *Clinical Trials Program Survey* to the WIO community. The results of this survey aided in structuring a comprehensive training and mentorship program for our members that we will be debuted this past year.

Join us for the Clinical Trials Training Program Breakout Session & Reception on Saturday, August 26th at 1:20 p.m. This will be an informative session followed by an exclusive networking mixer for physicians and medical affairs personnel - all are welcome! The companies listed below have committed to this one-of-a-kind educational program to empower women ophthalmologists in clinical trials research. Please join us in thanking them for their efforts.

CLEARSIDE BIO

900 North Point Pkwy, Ste 200
Alpharetta, GA 30005
(678) 270-3631
IR@clearsidebio.com
www.clearsidebio.com

Clearside Biomedical is a biopharmaceutical company revolutionizing the delivery of therapies to the back of the eye through the suprachoroidal space (SCS®). The platform provides an in-office, repeatable, non-surgical procedure, offering targeted and compartmentalized delivery to the macula, retina or choroid to potentially preserve and improve vision in patients with sight-threatening eye diseases. Our suprachoroidal injection technology can be used in conjunction with existing drugs designed for the SCS, novel therapies, and future therapeutic innovations. We are developing a pipeline of small molecule product candidates for administration via our SCS Microinjector®, and we are also looking to strategically partner with companies utilizing other ophthalmic therapeutic innovations. We believe our proprietary suprachoroidal administration platform has the potential to become a standard for delivery of therapies intended to treat chorioretinal diseases.

SIGHT SCIENCES

4040 Campbell Ave, Ste 100
Menlo Park, CA 94025
(877) 266-1144
info@sightsciences.com
www.sightsciences.com/us

Sight Sciences is an eyecare technology company focused on developing and commercializing innovative solutions intended to transform care and improve patients' lives. The Company's OMNI® Surgical System is a minimally invasive glaucoma surgery (MIGS) device indicated to reduce intraocular pressure in adult patients with primary open-angle glaucoma (POAG), the world's leading cause of irreversible blindness. The SION™ Surgical Instrument is a bladeless, manually operated device used in ophthalmic surgical procedures to excise trabecular meshwork. The Company's TearCare® System is 510(k) cleared in the United States for the application of localized heat therapy in adult patients with evaporative dry eye disease due to meibomian gland dysfunction (MGD), enabling office-based clearance of gland obstructions by physicians to address the leading cause of dry eye disease.

SKINCEUTICALS

10 Hudson Yards
New York, NY 10001
(800) 771-9489
www.skinceuticals.com

Our mission is to improve skin health. Dedicated to this purpose, we make one simple promise-to provide advanced skincare backed by science. Born from decades of skin cancer research that led to pivotal breakthroughs in antioxidants, our high potency formulas are concentrated in pure actives and proven to penetrate optimally into skin. Made in the USA, our clinical skincare is used by dermatologists, plastic surgeons, and medi-spas for daily homecare and to complement aesthetic procedures. We formulate to correct signs of aging, protect healthy skin, and prevent future damage.

SONIQUEANCE

2477 Grand Ave
Baldwin, NY 11510
(516) 654-4000
info@soniqueance.com
www.soniqueance.com

Mr. Alan Ellman has created Soniqueance to provide physicians with surgical precision, versatility, and safety unmatched by other electrosurgical and laser technologies. Using a 4.0 MHz output frequency that is over 8 times greater than that of electrosurgical devices, Soniqueance generators create microscopic lateral heat while cutting and coagulating, thereby protecting surrounding tissue from unwanted thermal injury. The result is improved healing results with fewer complications typically caused by excess lateral heat. Sixty years after creating the very first 4.0 MHz RF generator, the developers of Soniqueance bring Coupled 4.0 MHz and 1.7 MHz RF technology into the 21st century with clean, smooth high frequency waveforms for improved monopolar, bipolar and introducing Bipolar Turbo modalities. Soniqueance provides the best surgical outcomes in all areas including Dentistry & Oral Surgery, Dermatology, Plastic Surgery, ENT, Ophthalmology, Gynecology, and Veterinary.

CLAREON®
COLLECTION

THE CLAREON® COLLECTION IS COMPLETE

CLAREON® TORIC Glistening-free* BioMaterial with unrivaled rotational stability† and predictable performance.¹⁻⁶

CLAREON® VIVITY® The first and only non-diffractive wavefront shaping PCIOL with exceptional clarity,^{2,3*} monofocal-quality distance visual acuity, excellent intermediate vision, and functional near vision.^{1†}

CLAREON® PANOPTIX®

A full range of vision with exceptional clarity that lasts.^{7, 8*}

45%[§] of patients are willing to upgrade to an ATIOL, however, only **18%^{||}** are currently receiving one. Educate your patients on Alcon ATIOLs to meet their expectations.⁹

Learn more at [ClareonIOL.com](https://www.clareoniol.com)

* Defined as modified Miyata grade 0, <25mv/mm² over 3 years (n=138), and over 9 years (n=20), respectively. ATIOL=Advanced Technology IOL.

† In vitro comparison, P <0.05.

‡ Results from a prospective, randomized, parallel group, subject- and assessor-masked, multisite trial of 107 subjects bilaterally implanted with the AcrySof® IQ Vivity® Extended Vision IOL and 113 with the AcrySof® IQ IOL with 6 months follow-up.

¶ Snellen VA was converted from logMAR VA. A Snellen notation of 20/20-2 or better indicates a logMAR VA of 0.04 or better, which means 3 or more of the 5 ETDRS chart letters in the line were identified correctly.

§ N=297.

|| Q4 2022.

IMPORTANT PRODUCT INFORMATION: CLAREON® FAMILY OF IOLs

CAUTION: Federal law restricts these devices to sale by or on the order of a physician.

INDICATION: The family of **Clareon® intraocular lenses (IOLs)** includes the **Clareon® Aspheric Hydrophobic Acrylic** and **Clareon® Aspheric Toric IOLs**, the **Clareon® PanOptix® Trifocal Hydrophobic IOL**, **Clareon® PanOptix® Toric**, **Clareon® Vivity® Extended Vision Hydrophobic Posterior Chamber IOL** and **Clareon® Vivity® Toric IOLs**. Each of these IOLs is indicated for visual correction of aphakia in adult patients following cataract surgery. In addition, the **Clareon® Toric IOLs** are indicated to correct pre-existing corneal astigmatism at the time of cataract surgery. The **Clareon® PanOptix®** lens mitigates the effects of presbyopia by providing improved intermediate and near visual acuity, while maintaining comparable distance visual acuity with a reduced need for eyeglasses, compared to a monofocal IOL. The **Clareon® Vivity®** lens mitigates the effects of presbyopia by providing an extended depth of focus. Compared to an aspheric monofocal IOL, the lens provides improved intermediate and near visual acuity, while maintaining comparable distance visual acuity. All of these IOLs are intended for placement in the capsular bag.

WARNINGS / PRECAUTIONS:

General cautions for all Clareon® IOLs: Careful preoperative evaluation and sound clinical judgment should be used by the surgeon to decide the risk / benefit ratio before implanting any IOL in a patient with any of the conditions described in the Directions for Use that accompany each IOL. Physicians should target emmetropia, and ensure that IOL centration is achieved.

For the **Clareon® Aspheric Toric**, **PanOptix® Toric** and **Vivity® Toric IOLs**, the lens should not be implanted if the posterior capsule is ruptured, if the zonules are damaged, or if a primary posterior capsulotomy is planned. Rotation can reduce astigmatic correction; if necessary lens repositioning should occur as early as possible prior to lens encapsulation.

For the **Clareon® PanOptix® IOL**, some visual effects may be expected due to the superposition of focused and unfocused multiple images. These may include some perceptions of halos or starbursts, as well as other visual symptoms. As with other multifocal IOLs, there is a possibility that visual symptoms may be significant enough that the patient will request explant of the multifocal IOL. A reduction in contrast sensitivity as compared to a monofocal IOL may be experienced by some patients and may be more prevalent in low lighting conditions. Therefore, patients implanted with multifocal IOLs should exercise caution when driving at night or in poor visibility conditions. Patients should be advised that unexpected outcomes could lead to continued spectacle dependence or the need for secondary surgical intervention (e.g., intraocular lens replacement or repositioning). As with other multifocal IOLs, patients may need glasses when reading small print or looking at small objects. Posterior capsule opacification (PCO), may significantly affect the vision of patients with multifocal IOLs sooner in its progression than patients with monofocal IOLs.

For the **Clareon® Vivity® IOL**, most patients implanted with the **Vivity® IOL** are likely to experience significant loss of contrast sensitivity as compared to a monofocal IOL. Therefore, it is essential that prospective patients be fully informed of this risk before giving their consent for implantation of the **Clareon® Vivity® IOL**. In addition, patients should be warned that they will need to exercise caution when engaging in activities that require good vision in dimly lit environments, such as driving at night or in poor visibility conditions, especially in the presence of oncoming traffic. It is possible to experience very bothersome visual disturbances, significant enough that the patient could request explant of the IOL. In the parent AcrySof® IQ Vivity® IOL clinical study, 1% to 2% of AcrySof® IQ Vivity® IOL patients reported very bothersome starbursts, halos, blurred vision, or dark area visual disturbances; however, no explants were reported.

Prior to surgery, physicians should provide prospective patients with a copy of the Patient Information Brochure available from Alcon informing them of possible risks and benefits associated with these IOLs.

ATTENTION: Reference the Directions for Use labeling for each IOL for a complete listing of indications, warnings, and precautions.

SYFOVRE: The Importance of Identifying and Treating Patients

During this program we will discuss:

The importance of understanding:

- Identification of patients through risk factors, symptoms, and multimodal imaging
- SYFOVRE clinical data, dosing, and administration
- Appropriate patients for treatment and co-management

Speaker:

Jordana Fein, MD
Retina Group of Washington

When:

Friday, August 25, 2023

6:30 PM – 8:00 PM ET

Where:

JW Marriott Marco Island

Calusa Ballroom
400 S Collier Boulevard
Marco Island, FL

This program is intended for U.S. healthcare providers only. Guests and spouses may not attend this program. A meal will be provided during this educational program. In accordance with the Federal Physician Payment Sunshine Statute and any applicable state reporting laws, the value of the food and beverage provided, and your national provided identity will be disclosed to CMS and any applicable state agencies. This presentation is not a continuing medical education (CME) program.

APPROVED!**

NEW!

Miebo™
(perfluorohexyloctane
ophthalmic solution)

**Introducing MIEBO—indicated for the
treatment of the signs and symptoms of
dry eye disease (DED)**

**MIEBO is the first and only Rx eye drop
for DED that directly targets evaporation¹**

**Sign up to get updates about
MIEBO at [MIEBO-ECP.COM](https://www.miebo-ecp.com)**

INDICATION

MIEBO™ (perfluorohexyloctane ophthalmic solution) is a semifluorinated alkane indicated for the treatment of the signs and symptoms of dry eye disease.

IMPORTANT SAFETY INFORMATION

- MIEBO should not be administered while wearing contact lenses. Contact lenses should be removed before use and for at least 30 minutes after administration of MIEBO
- Instruct patients to instill one drop of MIEBO into each eye four times daily
- The safety and efficacy in pediatric patients below the age of 18 have not been established
- The most common ocular adverse reaction was blurred vision (1% to 3% of patients reported blurred vision and conjunctival redness)

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Please see Brief Summary of Prescribing Information for MIEBO on the adjacent page.

Reference: 1. MIEBO. Prescribing Information. Bausch & Lomb, Inc; 2023.

BAUSCH + LOMB

©2023 Bausch + Lomb
MBO.0010.USA.23

BRIEF SUMMARY OF PRESCRIBING INFORMATION

This Brief Summary does not include all the information needed to use MIEBO safely and effectively. See full Prescribing Information for MIEBO.

MIEBO™ (perfluorohexyloctane ophthalmic solution), for topical ophthalmic use

Initial U.S. Approval: 2023

1 INDICATIONS AND USAGE

MIEBO™ (perfluorohexyloctane ophthalmic solution) is indicated for the treatment of the signs and symptoms of dry eye disease (DED).

4 CONTRAINDICATIONS

None.

5 WARNINGS AND PRECAUTIONS

MIEBO should not be administered while wearing contact lenses. Advise patients that contact lenses should be removed prior to and for at least 30 minutes after administration of MIEBO.

6 ADVERSE REACTIONS

6.1 Clinical Trials Experience

Because clinical trials are conducted under widely varying conditions, adverse reaction rates observed in clinical trials of a drug cannot be directly compared to rates in the clinical trials of another drug and may not reflect the rates observed in practice.

In patients with DED, 614 patients received at least one dose of MIEBO in two randomized controlled clinical trials across 68 sites in the United States. The most common ocular adverse reaction was blurred vision. Blurred vision and conjunctival redness were reported in 1-3% of individuals.

8 USE IN SPECIFIC POPULATIONS

8.1 Pregnancy

Risk Summary

There are no adequate and well controlled studies with MIEBO in pregnant women.

In animal reproduction studies with oral administration of perfluorohexyloctane during the period of organogenesis, no adverse maternal or developmental effects were observed in rats at doses up to 162 times the recommended human ophthalmic dose (RHOD) (see *Data*). Maternal toxicity, miscarriages and reduced fetal weights were observed in rabbits at all doses tested, with the lowest dose as 41 times the RHOD.

All pregnancies have a risk of birth defect, loss, or other adverse outcomes. In the US general population, the estimated background risk of major birth defects is 2 to 4%, and of miscarriage is 15 to 20%, of clinically recognized pregnancies.

Data

Animal Data

An embryofetal study was conducted in pregnant rabbits administered perfluorohexyloctane by oral gavage on gestation days 6 to 19, to target the period of organogenesis.

Perfluorohexyloctane produced maternal toxicity, characterized by reduced body weight gain and food consumption, and miscarriages at all doses tested, with the lowest dose as ≥ 250 mg/kg/day (41 times the RHOD based on body surface area). Reduced fetal weights were also observed at ≥ 250 mg/kg/day but no fetal mortality or malformations. A no observed adverse effect level (NOAEL) for maternal toxicity was not established in rabbits.

An embryofetal study was conducted in pregnant rats administered perfluorohexyloctane by oral gavage on gestation days 6 to 17, to target the period of organogenesis. There was no evidence of embryofetal toxicity or teratogenicity at doses up to 2,000 mg/kg/day (162 times the RHOD).

8.2 Lactation

There are no data on the presence of perfluorohexyloctane in human milk, the effects on the breastfed infant, or the effects on milk production. The lack of clinical data during lactation precludes a clear determination of the risk of MIEBO to an infant during lactation; however, the developmental and health benefits of breastfeeding should be considered along with the mother's clinical need for MIEBO.

8.4 Pediatric Use

The safety and effectiveness of MIEBO in pediatric patients below the age of 18 years have not been established.

8.5 Geriatric Use

No overall differences in safety and effectiveness have been observed between elderly and younger patients.

12 CLINICAL PHARMACOLOGY

12.3 Pharmacokinetics

The pharmacokinetics of perfluorohexyloctane following topical ocular administration of MIEBO has not been quantitatively characterized in humans. A single pharmacokinetic (PK) study was conducted that showed low systemic perfluorohexyloctane blood levels after topical ocular administration. Perfluorohexyloctane was not metabolized by human liver microsomes in vitro.

13 NONCLINICAL TOXICOLOGY

13.1 Carcinogenesis, Mutagenesis, Impairment of Fertility

Long-term studies in animals have not been conducted to evaluate the carcinogenic potential of perfluorohexyloctane.

Perfluorohexyloctane was not mutagenic or clastogenic in a standard battery of genotoxicity tests, including a bacterial mutagenicity assay (Ames assay), an in vitro chromosome aberration assay using human peripheral lymphocytes, and an in vivo bone marrow micronucleus assay in rats.

17 PATIENT COUNSELING INFORMATION

Use with Contact Lenses

Advise patients that contact lenses should be removed prior to and for at least 30 minutes after administration of MIEBO.

Administration Instructions

Advise patients to instill one drop of MIEBO four times daily into each eye as depicted in the Administration Instructions.

Things to Do

Everglades National Park

www.nps.gov/ever/index.htm

The Everglades is an expansive area of land in south Florida, which consists of 1.5 million acres of wetland. Since the park covers such a large area of South Florida, planning is a must. There are three entrances to Everglades National Park and they are not connected, they are accessed through different areas of south Florida.

Shopping on 5th Avenue – Historic Main Street

www.fifthavenuesouth.com/

5th Avenue South is an irresistible mix of glamour and laid-back ease. Historic and modern architecture blend together here in eclectic sophistication, while tropical blooms and lush greenery grace the pedestrian-friendly promenades, and each storefront is filled with wonderful finds and delights.

Corkscrew Swamp Sanctuary

www.corkscrew.audubon.org/

A visit to Audubon's Corkscrew Swamp Sanctuary is a journey into the heart of the Everglades ecosystem. Discover the rugged beauty of this famed natural area on Corkscrew's famous boardwalk - a 2.25-mile adventure through pine flatwoods, wet prairie, around a marsh, and finally into the largest old-growth bald cypress forest in North America.

Guided Wave Runner Tours

www.marcoislandwatersports.com/adventures/guided-wave-runner-tour/

Experience an unforgettable journey from Marco beach into the Ten Thousand Islands of the Everglades with one of our professionally trained guides. As you skim near the mysterious mangrove forests, be thrilled by eco-sensitive encounters with dolphins, manatees, native birds, and other diverse wildlife residing in the mangroves. Your expert tour guide will highlight interesting facts about nature and the geography of the region.

Naples Zoo at Caribbean Gardens

www.napleszoo.org/

Naples Zoo is a nationally accredited zoo and yet much more than a walk-through zoo. This nonprofit also features a full day of fun activities. The paved path winds nearly a mile past rare and beautiful animals residing within a historic tropical garden of exotic plants first planted in 1919 with a fascinating history. In this tropical setting, you can take delight at seeing many of your favorite animals like lions, giraffes, monkeys, pythons, and bears.

Golisano Children's Museum of Naples

www.cmon.org/

A not-for-profit charitable organization founded in 2002, the Golisano Children's Museum of Naples (CMON) is a brain-building powerhouse and Southwest Florida's first museum devoted to children and families. This safe and wonderful place inspires children and families to have fun while learning together.

Local Dining Options

The Oyster Society

3 min drive/11 min walk from the JW Marriott

www.theoystersociety.com

One of the best restaurants in Marco Island is The Oyster Society. Conveniently located in the Marco Walk Plaza in the heart of Marco Island, this restaurant serves up what is freshly available in the area. The Oyster Society is a seafood restaurant. There's also a raw bar here. The Oysters are what this upscale place is most known for so you might want to order the popular Chef's Dozen Oysters or the Baked Oyster Platter. The restaurant serves some good cocktails and some classic desserts with a bit of a twist. Other attractions here are the art deco interiors and the live music on weekends.

Bistro Soleil

10 min drive from the JW Marriott

www.bistrosoleil.net

If you're looking for fine French food, the place to go is Bistro Soleil at the Olde Marco Inn. It's a family-owned restaurant and the magic in the kitchen can be attributed to Chef Denis Meurgue. Some of the specials here are Rack of Lamb and the Duck a l' Orange. You can also expect some good seafood and filet mignon, as well. Make sure to have some of Bistro Soleil's beignets served with Chantilly cream. This restaurant is open for dinner 6 days a week and has live music several evenings a week. They even have a children's menu. And there's outdoor seating when the weather allows.

LeeBe Fish

10 min drive from the JW Marriott

www.leebefish.com

If you'd like to try some of the freshest fish on the island, try LeeBe Fish. It's a no-frills place that only serves fish

that's caught that day. The restaurant has a boat that goes out into the water every day so LeeBe Fish catches its own fish and even sells some of it uncooked for those who would like to take it home and cook it their own way. This unique feature makes it one of the best restaurants in Marco Island! LeeBe Fish has both indoor and outdoor seating, and the pricing on the food here is reasonable; just be sure to carry some cash. It is a cash-only restaurant.

Fin Bistro

3 min drive/11 min walk from the JW Marriott

www.finbistro.com

If you'd like to have fresh fish in a more upscale restaurant, this is where to go. Fin Bistro is located off South Collier Boulevard. This restaurant takes great pride in its fresh fish — both the finned kind and the shellfish — and fresh produce. In fact, they use only seasonal vegetables. Know that the prawn and octopus appetizers are very popular. And their star dish is the Swordfish Picatta. If you're not into fish, you could go for pork chops, filet mignon, Wagyu burger, or chicken.

CJ's On The Bay

6 min drive from the JW Marriott

www.cjsonthebay.com

Another one of the best restaurants in Marco Island for seafood is CJ's On The Bay. It is a casual restaurant with an all-day menu. It's on the waterfront and comes with views of Smokehouse Bay. They also serve some good drinks and creative dishes here. You can even go fishing and bring your catch to CJ's to be cooked. Otherwise, you can order fried scallops, snapper, CJ's-style crab cakes or their special rum-butter Mahi Mahi. You'll also find things like seafood chowder and shrimp pasta and if you're not into seafood, or not in the mood for it, they've got chicken pot pie, pork chops and steak. CJ's on the Bay is in

the Esplanade Shoppes at Marco Island, and has both indoor and outdoor seating. It's a busy place so it would be a good idea to make reservations or eat at the gazebo bar, outside.

DaVinci Ristorante Italiano

3 min drive/11 min walk from the JW Marriott

www.ristorantedavinci.com

For Italian, head to DaVinci Ristorante Italiano in Marco Walk Plaza. This restaurant is the one under the Carvelli umbrella and a sister of these other popular restaurants — The Oyster Society and Marco Prime and Snook Inn. This restaurant is known for its delicious dishes. Guests rave about everything from the pastas to the pizzas, risottos to the desserts and drinks. The sauces used for the pastas are made from family recipes and are a class apart. The staff is knowledgeable and good with recommending dishes. Make sure to try the desserts here. The panna cotta, cannoli and tiramisu are all great choices.

Mango's Dockside Bistro

7 min drive from the JW Marriott

www.mangosdocksidebistro.com

Mango's Dockside Bistro is an American Bistro overlooking the marina and Smokehouse Bay. This waterfront restaurant is family-owned and is known for its large spread of food. The menu ranges from salads and sushi to tacos, hush puppies and seafood chowder. A favorite here is macadamia nut-crusted cobia and the black grouper. If you're not a fish person, another house special is the whiskey burger. Mango's Dockside Bistro is open for breakfast, lunch and dinner and has both indoor and outdoor seating. You can expect happy hour and live music several days a week.
